

Attention Fifteenmile Irrigators

The Fifteenmile Watershed Council has been hard at work sifting through off-channel water storage options to help irrigators and fish.

The council is currently exploring the option of a Managed Underground Storage Facility. This system would divert winter flow during the allotted months and store in an Aquifer Storage and Recovery facility and then pump the water back out into the stream during the irrigation season when temperatures are at their highest. The concept is to protect both you the irrigators and the fish that depend on Fifteenmile for your livelihoods.

The Fifteenmile Watershed Council needs your input.

Your thoughts are important and we need to hear them.

The outcome of this meeting will be the driving force for the steps we take next.

When: November 6, 2018 at 2:00 pm

Where: Alphonsus Parish Hall

Refreshments will be provided.
